

Electronics Engineer and Senior Software Engineer with almost 20 years of experience across embedded systems, enterprise platforms, automation and AI-driven solutions, with a strong focus on building technology that remains accessible and practical for end users.

Currently leading full project lifecycle initiatives at Brainlab, supporting and integrating solutions for a global organisation with more than 3,000 employees across multiple departments including Finance, HR, Accounting and IT. Acting as an internal technology consultant - identifying adoption opportunities, shaping AI-driven workflows, coaching non-technical colleagues on new tools, and delivering production-ready solutions under real operational and governance constraints.

Skills

AI & Machine Learning

Machine Learning

LLMs

Prompt Engineering

Local AI

Ollama

AI Strategy & Adoption

AI Governance

Computer Vision

Convolutional Neural Networks

Sensor Fusion

SLAM

Software & Cloud

C#/I.NET

JavaScript / Node.js

React

Python

SQL

PostgreSQL

CI/CD

Azure

Azure DevOps

Git

HTML/CSS

MATLAB

Enterprise Platforms

SharePoint

Power Platform

SAP Integrations

Salesforce (ITSM)

Methodologies

Agile

Scrum

Product Lifecycle Management

Stakeholder Management

Vendor Coordination

Hardware & Embedded

C/C++

PIC / LPC Microcontrollers

FPGA / CPLD

CAN / I2C

ZigBee / RFID / GPS

Experience

11.2020 - present

Munich, Germany

Brainlab SE

Senior Business Applications Developer

Power Platform & SharePoint Administrator / Apprenticeship Supervisor

- ▶ Acting as internal IT Product Manager across Finance, HR, Accounting and IT: owning initiative scoping, stakeholder alignment, vendor coordination and end-to-end delivery. Full project ownership from requirements and architecture through development, testing, production release and ongoing support.
- ▶ Integrated the company's full expense management processing, from 3rd party service provider integration and user provisioning to expense booking into SAP. Based on this expenses dataset, also developed a CO₂ emissions estimation tool using an OCR pipeline combined with a locally-hosted LLM (via Ollama) for structured data extraction from unstructured receipt text - a fully self-contained AI pipeline deployed without any external data exposure, ensuring strong security isolation.
- ▶ Building integrations across systems like SAP, SharePoint or Salesforce (ITSM) through a custom ESB (C#), or 3rd party service providers via REST API, implementing scalable workflow automation using Azure services and the Power Platform (PowerApps, Power Automate).
- ▶ Leading Power Platform and SharePoint governance and adoption strategy across the organisation. Coaching and mentoring apprentices (Azubis) on development practices, AI tools and automation workflows - designing practical training that builds confident, independent capability with new technologies.

ABOUT Brainlab is a global healthcare technology company innovating in surgery and radiation therapy for 35+ years, developing software and hardware to support healthcare providers in fighting cancer and neurological conditions.

02.2026 - present
Munich, Germany

- **AI-Driven SaaS Platform**

Founder & Principal Engineer

- ▶ Designed and built a full-stack platform leveraging LLMs and modern AI tooling to generate and deploy production-ready websites from natural language prompts alone. Covers the complete pipeline from prompt engineering to AI agents, structured content generation and automated deployment. Sole developer across product, architecture and delivery, built alongside work and family commitments.

ABOUT *Appsolutely is an AI-powered website generation platform. [appsolutely.services](#)*

05.2017 - 10.2020
Hallbergmoos (Munich),
Germany

- **EURO-LOG AG**

Senior Software Developer

- ▶ Engineered Transport and Supply Chain Management logistics platforms handling high-volume data across automotive, e-commerce and retail industries, optimising performance for complex, multi-targeted logistical operations.
- ▶ Integrated fleet tracking for leading automotive companies, producing global inventory reports for thousands of units displayed on maps using HERE maps, with zoom-reactive grouping and interactive detail panels.
- ▶ Worked in two-week agile sprints: picking up tickets, delivering, rolling to production, and feeding learnings back into the next sprint planning cycle.

ABOUT *Euro-Log provides Transport, Container and Supply Chain Management systems, shipment tracking and administration for automotive, e-commerce and retail industries.*

05.2011 - 04.2017
Buenos Aires, Argentina

- **TecnoCientífica SA**

Project Architect (R&D Department)

- ▶ Applied machine learning to industrial food quality measurement: built predictive models from curated [NIR spectrum → lab result] training datasets, enabling realtime quality assessment from spectral data alone - reducing time-to-result to virtually zero, from costly traditional laboratory chemical analysis to near instant in-plant predictions.
- ▶ Redesigned and unified three product families into a single C# .NET + C++ solution including a desktop application, firmware and communications protocol across PIC18 microprocessors using RS232, CAN and I2C protocols, deployed in both laboratory and realtime in-plant embedded environments, enabling process tuning and immediate quality-gate reaction capacity.

ABOUT *TecnoCientífica manufactures quality measurement and control devices for food processing industries, providing laboratory and realtime in-plant embedded solutions using NIR spectroscopy.*

06.2009 - 10.2010
Buenos Aires, Argentina

- **Sistelcom SRL**

Hardware & Software Developer

- ▶ Engineered remote electronic lock trackers, satellite-connected temperature control systems for refrigerated freight, GPRS/satellite status reporting and RFID driver login systems for transport realtime security applications.

ABOUT *Sistelcom is a telecommunications and operations services company providing infrastructure monitoring, technical support, logistics coordination, and 24/7 operational management services for business clients.*

Education

2019 - 2020

- **Udacity.com**

Self-Driving Car Engineer Nanodegree Program. Curriculum covered deep learning (CNNs, transfer learning), computer vision, sensor fusion (LiDAR/camera), localisation (particle filters, SLAM), path planning and PID control - a practical foundation in machine learning and neural networks applied to autonomous systems.

2003 - 2009

- **Instituto Tecnológico de Buenos Aires**

Electronics Engineering | 6-year University Diploma
Specialisation: Telecommunications

Languages

Spanish (native), German (C2/fluent) and English (C2/fluent). Dual German and Argentine citizen.
