

**ABOUT** Brainlab is a global healthcare technology company innovating in surgery and radiation therapy for 35+ years, developing software and hardware to support healthcare providers in fighting cancer and neurological conditions.

05.2017 - 10.2020

Hallbergmoos (Munich),  
Germany

• **EURO-LOG AG**

Senior Software Developer

- ▶ Engineered Transport and Supply Chain Management logistics platforms handling high-volume data across automotive, e-commerce and retail industries, optimising performance for complex, multi-targeted logistical operations.
- ▶ Integrated fleet tracking for leading automotive companies, producing global inventory reports for thousands of units displayed on maps using HERE maps, with zoom-reactive grouping and interactive detail panels.
- ▶ Worked in two-week agile sprints: picking up tickets, delivering, rolling to production, and feeding learnings back into the next sprint planning cycle.

**ABOUT** Euro-Log provides Transport, Container and Supply Chain Management systems, shipment tracking and administration for automotive, e-commerce and retail industries.

05.2011 - 04.2017

Buenos Aires, Argentina

• **TecnoCientífica SA**

Project Architect (R&D Department)

- ▶ Applied machine learning to industrial food quality measurement: built predictive models from curated [NIR spectrum → lab result] training datasets, enabling realtime quality assessment from spectral data alone - reducing time-to-result to virtually zero, from costly traditional laboratory chemical analysis to near instant in-plant predictions.
- ▶ Redesigned and unified three product families into a single C# .NET + C++ solution including a desktop application, firmware and communications protocol across PIC18 microprocessors using RS232, CAN and I2C protocols, deployed in both laboratory and realtime in-plant embedded environments, enabling process tuning and immediate quality-gate reaction capacity.

**ABOUT** TecnoCientífica manufactures quality measurement and control devices for food processing industries, providing laboratory and realtime in-plant embedded solutions using NIR spectroscopy.

06.2009 - 10.2010

Buenos Aires, Argentina

• **Sistelcom SRL**

Hardware & Software Developer

- ▶ Engineered remote electronic lock trackers, satellite-connected temperature control systems for refrigerated freight, GPRS/satellite status reporting and RFID driver login systems for transport realtime security applications.

**ABOUT** Sistelcom is a telecommunications and operations services company providing infrastructure monitoring, technical support, logistics coordination, and 24/7 operational management services for business clients.

## Education

2019 - 2020

• **Udacity.com**

Self-Driving Car Engineer Nanodegree Program. Curriculum covered deep learning (CNNs, transfer learning), computer vision, sensor fusion (LiDAR/camera), localisation (particle filters, SLAM), path planning and PID control - a practical foundation in machine learning and neural networks applied to autonomous systems.

2003 - 2009

• **Instituto Tecnológico de Buenos Aires**

Electronics Engineering | 6-year University Diploma  
Specialisation: Telecommunications

1995 - 1999

• **Instituto Primo Capraro High School**

Bachiller Mercantil (Economics Specialisation)

## Languages

Spanish (native), German (C2/fluent) and English (C2/fluent). Dual German and Argentine citizen, based in Munich since 2017.

# Personal Projects

---

- 02.2026 - present

- AI-Driven Website Generation Platform**  
Personal initiative. Designed and built a full-stack platform leveraging LLMs and modern AI tooling to generate and deploy production-ready websites from user prompts alone. Covers the complete AI pipeline from prompt engineering to AI agents and skills, structured content generation and automated deployment - built initially to test the concept and help close friends and family, with live production results demonstrating the platform end-to-end.
- 2008 - 2009

- ITBA R&D Awards, Buenos Aires**  
1st place (2008): "Pre-processing of images for matrix code (QR codes) decoding in embedded systems."  
  
Mention of honour (2007): "An Image Restoration Method for Natural Scene Images Distorted by Camera Shake Blurring."
