

Electronics Engineer and Senior Software Engineer with almost 20 years of experience across embedded systems, enterprise platforms, automation and AI-driven solutions, with a strong focus on building technology that remains accessible and practical for end users.

Currently leading full project lifecycle initiatives at Brainlab, supporting and integrating solutions for a global organisation with more than 3,000 employees across multiple departments including Finance, HR, Accounting and IT. Acting as an internal technology consultant - identifying adoption opportunities, shaping AI-driven workflows, coaching non-technical colleagues on new tools, and delivering production-ready solutions under real operational and governance constraints.

## Skills

### AI & Machine Learning

Machine Learning LLMs Prompt Engineering Local AI Ollama AI Strategy & Adoption

AI Governance Computer Vision Convolutional Neural Networks Sensor Fusion SLAM

### Software & Cloud

C#/ .NET JavaScript / Node.js React Python SQL PostgreSQL CI/CD Azure

Azure DevOps Git HTML/CSS MATLAB

### Enterprise Platforms

SharePoint Power Platform SAP Integrations Salesforce (ITSM)

### Methodologies

Agile Scrum Product Lifecycle Management Stakeholder Management Vendor Coordination

### Hardware & Embedded

C/C++ PIC / LPC Microcontrollers FPGA / CPLD CAN / I2C ZigBee / RFID / GPS

## Experience

11.2020 - present

Munich, Germany

### • Brainlab SE

Senior Business Applications Developer

Power Platform & SharePoint Administrator / Apprenticeship Supervisor

- ▶ Acting as internal IT Product Manager across Finance, HR, Accounting and IT: owning initiative scoping, stakeholder alignment, vendor coordination and end-to-end delivery. Full project ownership from requirements and architecture through development, testing, production release and ongoing support.
- ▶ Integrated the company's full expense management processing, from 3rd party service provider integration and user provisioning to expense booking into SAP. Based on this expenses dataset, also developed a CO<sub>2</sub> emissions estimation tool using an OCR pipeline combined with a locally-hosted LLM (via Ollama) for structured data extraction from unstructured receipt text - a fully self-contained AI pipeline deployed without any external data exposure, ensuring strong security isolation.
- ▶ Building integrations across systems like SAP, SharePoint or Salesforce (ITSM) through a custom ESB (C#), or 3rd party service providers via REST API, implementing scalable workflow automation using Azure services and the Power Platform (PowerApps, Power Automate).
- ▶ Leading Power Platform and SharePoint governance and adoption strategy across the organisation. Coaching and mentoring apprentices (Azubis) on development practices, AI tools and automation workflows - designing practical training that builds confident, independent capability with new technologies.

**ABOUT** Brainlab is a global healthcare technology company innovating in surgery and radiation therapy for 35+ years, developing software and hardware to support healthcare providers in fighting cancer and neurological conditions.
