Professional Profile

Electronics Engineer and Senior Software Developer with 15+ years delivering production systems across the full stack — from realtime embedded firmware to enterprise web platforms and AI pipelines. Proven track record of driving technology adoption at scale: leading full project lifecycle (requirements gathering, architecture, development, deployment and post-release reviews) at Brainlab for a global 3,000+ employee organisation, acting as internal technology consultancy across HR, Finance, IT and Accounting departments. Hands-on AI practitioner with real-world machine learning implementations spanning industrial spectroscopy, LLM-powered document processing and fully autonomous AI-driven web generation. Fluent in three languages (Spanish, German, English), equally comfortable in deep technical conversations and in translating AI complexity into actionable strategy for non-technical leadership — with a focus on responsible, privacy-aware adoption over hype.

Work Experience

11.2020 - present

Munich, Germany

• Brainlab

Senior Business Applications Developer / Power Platform & SharePoint Administrator /

Apprentice Trainer

- ▶ Full project ownership from stakeholder requirements and architecture through development, testing and production release - operating as an internal technology consultancy: departments across HR, Finance, IT and Accounting bring ideas, which are assessed, shaped into concrete projects and delivered end-to-end.
- ▶ Developed a CO2 emissions estimation tool using an OCR pipeline combined with a locally-hosted LLM (Ollama) for structured data extraction from unstructured receipt text - a fully self-contained AI pipeline deployed without any external data exposure.
- ▶ Building integrations across SAP, SharePoint and Salesforce through a custom ESB (C#), implementing scalable workflow automation using Azure services and the Power Platform (PowerApps, Power Automate, Power BI).
- ▶ Responsible for Power Platform and SharePoint governance and adoption. Coaching and mentoring apprentices (Azubis) on AI/automation tools, development best practices and critical business processes.
- ▶ Led internal evaluation and adoption strategy for AI tooling: assessing options against governance, privacy and practical fit criteria, defining usage guidelines, and running knowledge-transfer sessions that moved non-technical teams from passive recipients of automation to active participants in shaping it.

STACK C# · .NET · React · Azure · MS Power Platform · SharePoint · SQL · Ollama

ABOUT Brainlab is a global healthcare technology company innovating in surgery and radiation therapy for 35+ years, developing software and hardware to support healthcare providers in fighting cancer and neurological conditions.

05.2017 - 10.2020

Hallbergmoos (Munich),
Germany

• EURO-LOG A.G.

Senior Software Developer

- ▶ Engineered Transport and Supply Chain Management logistics platforms handling high-volume data across automotive, e-commerce and retail industries, optimising performance for complex, multi-targeted logistical operations.

STACK ASP.NET C# · HTML · JavaScript · SQL

ABOUT Euro-Log provides Transport, Container and Supply Chain Management systems, shipment tracking and administration for automotive, e-commerce and retail industries.

05.2011 - 04.2017
Buenos Aires, Argentina

TecnoCientífica S.A.

Project Architect (R&D Department)

Applied machine learning to industrial food quality measurement: curated [NIR spectrum → lab result] training datasets and built predictive models enabling real-time quality assessment from spectral data alone - replacing costly traditional laboratory chemical analysis with instant in-plant predictions.

Redesigned and unified three product families into a single C# .NET + C++ solution across PIC18 microprocessors using RS232/CAN/I2C protocols, deployed in both laboratory and real-time in-plant embedded environments.

STACK C# .NET · C++ · Python · PIC18 · RS232 · CAN · I2C

ABOUT TecnoCientífica manufactures quality measurement and control devices for food processing industries, providing laboratory and real-time in-plant embedded solutions.

06.2009 - 10.2010
Buenos Aires, Argentina

Sistelcom S.R.L.

Hardware & Software Developer

Engineered remote electronic lock trackers, satellite-connected temperature control systems for refrigerated freight, GPRS/satellite status reporting and RFID driver login systems for transport security applications.

STACK C# · C++ · WinForms · XBee · RFID · GPRS

ABOUT Sistelcom is an Argentine telecommunications and operations services company providing infrastructure monitoring, technical support, logistics coordination, and 24/7 operational management services for business clients.

Education

2019 - 2020

Udacity.com

Self-Driving Car Engineer Nanodegree Program. Curriculum covered deep learning (CNNs, transfer learning, semantic segmentation), computer vision, sensor fusion (LiDAR/camera), localization (particle filters, SLAM), path planning and PID control — a practical foundation in machine learning and neural networks applied to autonomous systems.

2003 - 2009

Instituto Tecnológico de Buenos Aires

Electronics Engineering Diploma

Specialization: Telecommunications

1998 - 2003

Secondary School, Buenos Aires, Argentina

Bachiller Mercantil (Economics Specialization)

Languages

Spanish (native), German (C2/fluent) and English (C2/fluent)

Skills Summary

AI & Machine Learning

Machine Learning

LLMs

Prompt Engineering

Local AI (Ollama)

AI Strategy & Adoption

AI Governance

Computer Vision

Convolutional Neural Networks

Sensor Fusion

SLAM

DSP

Software & Cloud

C#/.NET

Python

JavaScript / Node.js

React

SQL

Azure

Azure DevOps

MongoDB

Git

HTML/CSS

Enterprise Platforms

PowerApps

Power Automate

Power BI

SharePoint

SAP Integration

Salesforce Integration

Hardware & Embedded

C/C++

PIC / LPC μControllers

FPGA / CPLD

CAN / I2C / ZigBee

RFID / GPS

Personal Projects

02.2026 - present
AI-Driven Website Generation Platform

Personal initiative. Designed and built a full-stack platform leveraging LLMs and modern AI tooling to generate and deploy production-ready websites. Covers the complete AI pipeline from prompt engineering to structured content generation and automated deployment - built initially to help close friends and family, with live production results demonstrating the platform end-to-end.

2008 - 2009

ITBA R&D Awards, Buenos Aires

1st place (2008): "Pre-processing of images for matrix code (QR codes) decoding in embedded systems."

Mention of honour (2007): "An Image Restoration Method for Natural Scene Images Distorted by Camera Shake Blurring."
