

05.2011 - 04.2017
Buenos Aires, Argentina

- TecnoCientífica S.A.**

Project Architect (R&D Department)

- Applied machine learning to industrial food quality measurement: curated [NIR spectrum → lab result] training datasets and built predictive models enabling real-time quality assessment from spectral data alone - replacing costly traditional laboratory chemical analysis with instant in-plant predictions.
 - Redesigned and unified three product families into a single C# .NET + C++ solution across PIC18 microprocessors using RS232/CAN/I2C protocols, deployed in both laboratory and real-time in-plant embedded environments.

STACK C# .NET · C++ · Python · PIC18 · RS232 · CAN · I2C

ABOUT TecnoCientífica manufactures quality measurement and control devices for food processing industries, providing laboratory and real-time in-plant embedded solutions.

06.2009 - 10.2010
Buenos Aires, Argentina

- Sistelcom S.R.L.**

Hardware & Software Developer

- Engineered remote electronic lock trackers, satellite-connected temperature control systems for refrigerated freight, GPRS/satellite status reporting and RFID driver login systems for transport security applications.

STACK C# · C++ · WinForms · XBee · RFID · GPRS

ABOUT Sistelcom is an Argentine telecommunications and operations services company providing infrastructure monitoring, technical support, logistics coordination, and 24/7 operational management services for business clients.

Education

2019 - 2020

- Udacity.com**

Self-Driving Car Engineer Nanodegree Program. Curriculum covered deep learning (CNNs, transfer learning, semantic segmentation), computer vision, sensor fusion (LiDAR/camera), localization (particle filters, SLAM), path planning and PID control — a practical foundation in machine learning and neural networks applied to autonomous systems.

2003 - 2009

- Instituto Tecnológico de Buenos Aires**

Electronics Engineering Diploma
Specialization: Telecommunications

1998 - 2003

- Secondary School, Buenos Aires, Argentina**

Bachiller Mercantil (Economics Specialization)

Languages

Spanish (native), German (C2/fluent) and English (C2/fluent)

Skills Summary

AI & Machine Learning

Machine Learning

LLMs

Prompt Engineering

Local AI (Ollama)

Computer Vision

Convolutional Neural Networks

Sensor Fusion

SLAM

DSP

Software & Cloud

C#/.NET

Python

JavaScript / Node.js

React

SQL

Azure

Azure DevOps

MongoDB

Git

HTML/CSS

Enterprise Platforms

PowerApps

Power Automate

Power BI

SharePoint

SAP Integration

Salesforce Integration

Hardware & Embedded

C/C++

PIC / LPC μControllers

FPGA / CPLD

CAN / I2C / ZigBee

RFID / GPS

Personal Projects

02.2026 - present

AI-Driven Website Generation Platform

Personal initiative. Designed and built a full-stack platform leveraging LLMs and modern AI tooling to generate and deploy production-ready websites. Covers the complete AI pipeline from prompt engineering to structured content generation and automated deployment - built initially to help close friends and family, with live production results demonstrating the platform end-to-end.

2008 - 2009

ITBA R&D Awards, Buenos Aires

1st place (2008): "Pre-processing of images for matrix code (QR codes) decoding in embedded systems."

Mention of honour (2007): "An Image Restoration Method for Natural Scene Images Distorted by Camera Shake Blurring."
