Professional Profile

Electronics Engineer and Senior Software Developer with 15+ years delivering production systems across the full stack - from realtime embedded firmware to enterprise web platforms and AI pipelines. Proven track record of driving technology adoption at scale: leading full project lifecycle (requirements gathering, architecture, development, deployment and post-release reviews) at Brainlab for a global 3,000+ employee organisation, acting as internal technology consultancy across HR, Finance, IT and Accounting departments. Hands-on AI practitioner with real-world machine learning implementations spanning industrial spectroscopy, LLM-powered document processing and fully autonomous AI-driven web generation.

Work Experience

11.2020 - present

- **Brainlab**

Munich, Germany

Senior Business Applications Developer / Power Platform & SharePoint Administrator / Apprentice Trainer

- Full project ownership from stakeholder requirements and architecture through development, testing and production release - operating as an internal technology consultancy: departments across HR, Finance, IT and Accounting bring ideas, which are assessed, shaped into concrete projects and delivered end-to-end.
- Developed a CO2 emissions estimation tool using an OCR pipeline combined with a locally-hosted LLM (Ollama) for structured data extraction from unstructured receipt text - a fully self-contained AI pipeline deployed without any external data exposure.
- Building integrations across SAP, SharePoint and Salesforce through a custom ESB (C#), implementing scalable workflow automation using Azure services and the Power Platform (PowerApps, Power Automate, Power BI).
- Responsible for Power Platform and SharePoint governance and adoption. Coaching and mentoring apprentices (Azubis) on AI/automation tools, development best practices and critical business processes.
- C# .NET, React, Azure, MS Power Platform, SharePoint and SQL.

About the company: Brainlab is a global healthcare technology company innovating in surgery and radiation therapy for 35+ years, developing software and hardware to support healthcare providers in fighting cancer and neurological conditions.

05.2017 - 10.2020

- **EURO-LOG A.G.**

Hallbergmoos (Munich), Germany

Senior Software Developer

- Engineered Transport and Supply Chain Management logistics platforms handling high-volume data across automotive, e-commerce and retail industries, optimising performance for complex, multi-targeted logistical operations.
- ASP.NET C#, HTML, JavaScript and SQL.

About the company: Euro-Log provides Transport, Container and Supply Chain Management systems, shipment tracking and administration for automotive, e-commerce and retail industries.

05.2011 - 04.2017

• **TecnoCientífica S.A.**

Ciudad Autónoma de Buenos Aires, Argentina

Project Architect (R&D Department)

- Applied machine learning to industrial food quality measurement: curated [NIR spectrum → lab result] training datasets and built predictive models enabling real-time quality assessment from spectral data alone - replacing costly traditional laboratory chemical analysis with instant in-plant predictions.
- Redesigned and unified three product families into a single C# .NET + C++ solution across PIC18 microprocessors using RS232/CAN/I2C protocols, deployed in both laboratory and real-time in-plant embedded environments.

About the company: TecnoCientífica manufactures quality measurement and control devices for food processing industries, providing laboratory and real-time in-plant embedded solutions.

06.2009 - 10.2010

• **Sistelcom S.R.L.**

Ciudad Autónoma de Buenos Aires, Argentina

Hardware & Software Developer

- Engineered remote electronic lock trackers, satellite-connected temperature control systems for refrigerated freight, GPRS/satellite status reporting and RFID driver login systems for transport security applications.

Education

2019 - 2020

• **Udacity.com**

Self-Driving Car Engineer Nanodegree Program.

2003 - 2009

• **Instituto Tecnológico de Buenos Aires**

Electronics Engineering Diploma

Specialization: Telecommunications

1998 - 2003

• **Secondary School, Buenos Aires, Argentina**

Bachiller Mercantil (Economics Specialization)

Languages Spanish (native), German (C2/fluent) and English (C2/fluent)

Skills Summary

AI & Machine Learning

Machine Learning

LLMs

Prompt Engineering

Local AI (Ollama)

Computer Vision

Convolutional Neural Networks

Sensor Fusion

SLAM

DSP

Software & Cloud

C#/.NET

Python

JavaScript / Node.js

React

SQL

Azure

Azure DevOps

MongoDB

Git

HTML/CSS

Enterprise Platforms

PowerApps

Power Automate

Power BI

SharePoint

SAP Integration

Salesforce Integration

Hardware & Embedded

C/C++

PIC / LPC μControllers

FPGA / CPLD

CAN / I2C / ZigBee

RFID / GPS

Personal Projects

02.2026 - present

AI-Driven Website Generation Platform

Personal initiative. Designed and built a full-stack platform leveraging LLMs and modern AI tooling to generate and deploy production-ready websites. Covers the complete AI pipeline from prompt engineering to structured content generation and automated deployment - built initially to help close friends and family, with live production results demonstrating the platform end-to-end.

2008 - 2009

ITBA R&D Awards, Buenos Aires

1st place (2008): "Pre-processing of images for matrix code (QR codes) decoding in embedded systems."

Mention of honour (2007): "An Image Restoration Method for Natural Scene Images Distorted by Camera Shake Blurring."
