

05.2017 - 10.2020

Hallbergmoos (Munich),
Germany

- **EURO-LOG AG**

Senior Software Developer

- ▶ Engineered Transport and Supply Chain Management logistics platforms handling high-volume data across automotive, e-commerce and retail industries, optimising performance for complex, multi-targeted logistical operations.
- ▶ Integrated fleet tracking for leading automotive industries, producing global inventory reports for thousands of units in maps using HERE maps, with zoom-reactive grouping and interactive detail panels.

STACK ASP.NET C# · HTML · JavaScript · SQL

ABOUT Euro-Log provides Transport, Container and Supply Chain Management systems, shipment tracking and administration for automotive, e-commerce and retail industries.

05.2011 - 04.2017

Buenos Aires, Argentina

- **TecnoCientífica SA**

Project Architect (R&D Department)

- ▶ Applied machine learning to industrial food quality measurement: built predictive models from curated [NIR spectrum → lab result] training datasets, enabling realtime quality assessment from spectral data alone - reducing time-to-result down to virtually zero, from costly traditional laboratory chemical analysis to near instant in-plant predictions.
- ▶ Redesigned and unified three product families into a single C# .NET + C++ solution including Desktop app, firmware and communications protocol across PIC18 microprocessors using RS232/CAN/I2C protocols, deployed in both laboratory and realtime in-plant embedded environments, enabling process tuning and immediate quality-gate reaction capacity.

STACK C# · .NET · C++ · Python · PIC18 · RS232 · CAN · I2C

ABOUT TecnoCientífica manufactures quality measurement and control devices for food processing industries, providing laboratory and realtime in-plant embedded solutions using NIR spectroscopy.

06.2009 - 10.2010

Buenos Aires, Argentina

- **Sistelcom SRL**

Hardware & Software Developer

- ▶ Engineered remote electronic lock trackers, satellite-connected temperature control systems for refrigerated freight, GPRS/satellite status reporting and RFID driver login systems for transport realtime security applications.

STACK C# · C++ · WinForms · XBee · RFID · GPRS

ABOUT Sistelcom is a telecommunications and operations services company providing infrastructure monitoring, technical support, logistics coordination, and 24/7 operational management services for business clients.

Education

2019 - 2020

- **Udacity.com**

Self-Driving Car Engineer Nanodegree Program. Curriculum covered deep learning (CNNs, transfer learning), computer vision, sensor fusion (LiDAR/camera), localisation (particle filters, SLAM), path planning and PID control — a practical foundation in machine learning and neural networks applied to autonomous systems.

2003 - 2009

- **Instituto Tecnológico de Buenos Aires**

Electronics Engineering | 6-year University Diploma
Specialisation: Telecommunications

1995 - 1999

- **Instituto Primo Capraro High School**

Bachiller Mercantil (Economics Specialisation)

Languages

Spanish (native), German (C2/fluent) and English (C2/fluent)

Skills Summary

AI & Machine Learning	Machine Learning	LLMs	Prompt Engineering	Local AI	Ollama	AI Strategy & Adoption	AI Governance	Computer Vision	Convolutional Neural Networks	Sensor Fusion	SLAM
Software & Cloud	C#/.NET	JavaScript / Node.js	React	Python	SQL	PostgreSQL	Azure	Azure DevOps	Git	HTML/CSS	Matlab
Enterprise Platforms	SharePoint	Power Platform	SAP Integrations								
Hardware & Embedded	C/C++	PIC / LPC μControllers	FPGA / CPLD	CAN / I2C	ZigBee / RFID / GPS						

Personal Projects

02.2026 - present	AI-Driven Website Generation Platform Personal initiative. Designed and built a full-stack platform leveraging LLMs and modern AI tooling to generate and deploy production-ready websites from user prompts only. Covers the complete AI pipeline from prompt engineering to AI agents and skills, structured content generation and automated deployment - built initially to test the concept and help close friends and family, with live production results demonstrating the platform end-to-end.
2008 - 2009	ITBA R&D Awards, Buenos Aires 1st place (2008): "Pre-processing of images for matrix code (QR codes) decoding in embedded systems." Mention of honour (2007): "An Image Restoration Method for Natural Scene Images Distorted by Camera Shake Blurring."
